GRI Readers'  
Choice Awards  
2010

## Share your opinion, nominate reports and win a ticket to the GRI Conference!

The world is at a critical juncture, our future is at stake. The coming decades will see the impending sustainability crisis become a sharp and clear reality. The true costs of climate change, energy use, resource depletion and inequality will hit home in a world likely to be shared by some nine billion people.

Sustainability reporting is vital in helping us to address these challenges, and build a better future. With trust shaken by the financial crisis, the public demands transparency.

Insight in sustainability performance of companies is important to a variety of stakeholders. The Readers' Choice Awards is an opportunity to have your say about sustainability reporting.

***As an academic you help decide the winner of the Civil Society Award.***
